FROM: MOISES ARTOLA, FINANCE MANAGER
Hesperia Recreation and Park District

TO: KYLE WOOLLEY, GENERAL MANAGER
Hesperia Recreation and Park District

SUBJECT: TYLER EMPLOYEE ACCESS PRO/TIME & ATTENDANCE

The Finance Manager along with the assistance of the Administrative Services Manager are starting the process to migrate to Tyler Employee Access Pro/Time & Attendance for timekeeping, activity tracking, employee time entry, supervisory approval, and payroll processing. I would like to provide you with a brief explanation of the estimated six-month timeline for the go-live process. The duration is necessary for the following key reasons:

1. **Needs Assessment:** Prior to my arrival at Hesperia Recreation & Park District, the previous Finance Manager appears to have been spearheading the project. The project was abandoned at some point during the previous tenure. On my arrival, the focus was to migrate three disparate financials systems into one (Tyler Incode 10) and to prepare for the FY23 Financial Statement Audit. Since I was not part of the original project, I will need to familiarize myself with how the software works. As you are aware, payroll is not something we want to do incorrectly.
2. **Needs Customization:** Now that the audit is near completion, I can focus more time to move ahead with Tyler Employee Access Pro/Time & Attendance transition. First, I would like to take time to understand how the software works. I have reached out to Tyler, and they will connect me with a representative at a cost of \$160.00 per hour to explain the process. Tyler Incode 10 has many complexities built in and it is imperative to understand the processes to correctly build the activities the District would like to track and to ensure that the payroll process is migrating data correctly from Tyler Employee Access Pro/Time & Attendance. If an issue arises from the payroll process, I will be able to track the problem and fix it as Payroll is a time sensitive matter.

3. **Testing and Quality Assurance:** Once the set-up is completed, crucial testing will need to be completed to identify and address any potential issues before the software goes live. This includes functional testing, integration testing, and user acceptance testing. The testing phase is essential for ensuring the reliability and stability of the system. The last thing we want is to find errors as the system is live.
4. **Change Management and Communication:** Implementing new software involves a notable change for the organization. As you are aware, not all of our employees work with a computer. Management will have to develop a plan to allow employees at separate sites to have access to computers to record their time. Conversely, for our part-time employees, the system can designate delegates to enter time on behalf of the part-time employee and subsequently approved by the Recreation Manager.

Regarding the biometric option, Tyler Employee Access Pro/Time & Attendance uses proprietary technology/coding that does not allow for third party applications to integrate with any Tyler products. We are limited as to the functionality that Tyler can provide. However, Tyler did mention that they have a separate time keeping software called ExecuTime/Time & Attendance that has a stationary time clock that is able to read proximity tags, mag readers, biometrics, and can be used in congruity with Tyler Employee Access Pro/Time & Attendance. I would like to highlight that this is a separate software than Tyler Employee Access Pro/Time & Attendance and will come at an additional cost. Please see attached documentation from Tyler for time clock costs. Additionally, implementation services will be an additional cost.

Thank you.

Hi Moises,

Tyler ESS is not configured to use time clock devices. But we do have a system call ExecuTime and attached are the time clock devices configured for that software. Below I've listed the breakdown for each piece.

Employee Access Pro:

- Allows employees to view their personal information, W-4 elections, and pay history. Even includes a built in paycheck calculator to help determine how changes in their earnings, withholdings, and deductions will impact their net pay.
- Enable staff to search and print frequently requested information such as pay and leave history with on-demand access.
- Post important announcements, helpful links, and notifications available in one centralized place.
- Downloadable HR and payroll forms/documents by making available from a single location.
- Integrates with HR and Payroll.

Employee Access Time & Attendance (this is not a clock in/out software):

- Allows employees to submit leave requests, enter time/hours worked, or assign authorized individuals to report for others.
- Flexibility to track and report time by user-defined activities.
- Detailed time and leave history summaries are available for individual employees or a group of individuals.
- Ability to generate multiple standard reports.
- Integrates with Payroll and Project Accounting.

ExecuTime (electronic clock in/out software):

- Electronic clock in/out.
- Time tracking and exception reporting.
- Employee benefit time request and management.
- Time-off scheduling calendar.
- Electronic timesheet approvals.
- Integrates with Payroll.
- Please refer to attachment; time clock devices that can be used with software.

In some cases, clients use all three pieces; specific employees use ExecuTime for the clock in/out feature, while other administrative staff members use Employee Access Time & Attendance. Whatever the organization prefers.

If you have any additional questions or need further information please let me know and I'd be happy to help.

Thank you,
